AAMA Fenestration Exterior Profile Certification Program

April 20, 2016

This directory lists the producers (and their code designations) who are licensees of the AAMA Fenestration Exterior Profile Certification Program. This Certification Program consists of ongoing laboratory and weatherability testing of profiles randomly selected by AAMA's Validator to determine compliance with the appropriate AAMA 300-Series Specification. Certification procedures are fully described in the respective procedural guides for the various materials (vinyl [PVC], fiberglass, and molded aliphatic polyurethane) for the *AAMA Fenestration Exterior Profile Certification Program*.

Only certified profiles may be used in a window or sliding glass door which is labeled in the AAMA Window and Door Certification Program. Not all producers certify every one of their products.

To verify the current certification status of any licensee's specific profile(s), contact AAMA's Validator, Associated Laboratories, Inc. at (214) 565-0593.
