ORDER OUR PUBLICATIONS ONLINE

Since 1936, AAMA has been developing an extensive source of technical information on the fenestration industry, covering all aspects of windows, glass doors, storm windows and doors, curtain walls, storefronts, skylights and space enclosures, siding, and related products and their usage.

You can now order all of our current standards online, with the majority downloadable in PDF format. Visit our online publication store: www.aamanet.org for details and instructions, and complete your entire order on the web!

NOTE: Our printed publication catalog is updated and issued every time a document is published. The prices listed herein are subject to change, and do not reflect price changes made since the release of this catalog. For current pricing on all of our documents, please visit our web site publication store at www.aamanetstore.org, or contact our Publication Specialist at 847-303-5664.

MARKET INFORMATION REPORTS

AAMA/WDMA 2009/2010 North American Industry Market Studies

This study combines the Market Size Report, the National Statistical Review, the Channel Distribution Report, a compilation of eleven Regional Statistical Reviews, and the Installation Practices and Procedures Report.

The Market Size Report (MSR-09) quantifies residential and non-residential market volumes both historic and projected. Study findings include data on new construction and remodeling by building category. Windows, doors, skylights, patio doors, storm windows and doors, U.S. construction activity, market size and projected growths are detailed and segmented into geographic areas.

The National Statistical Review and Forecast (MIR-09) is a compilation of data from government and industry sources useful in forecasting industry outlook. It contains review, summary and projections of residential, non-residential and remodeling trends.

The Channel Distribution Report (CDR-09) profiles the U.S. market for residential windows and doors as it flows through the identified distribution channels. Product volume estimates through the channels to the end user are based on 2009 market figures for residential windows and doors.

The Installation Practices and Procedures Report (IPR-09) summarizes the results of a special research effort to evaluate installation products and procedures specific to the window and door market.

The studies are sold on a CD, in Adobe Acrobat files, that make navigation and printing very easy with links, thumbnails and search options. (Published May 2010)

IMS-09 (Non-Member First CD) \$3,300.00
IMS-09 (Non-Member Additional CD's)..... \$330.00
IMS-09 (Member CD's) \$100.00

AAMA/WDMA U.S. Industry Market Size Report

The Market Size Report quantifies residential and non-residential market volumes both historic and projected. Study findings include data on new construction and remodeling by building category. Windows, doors, skylights, patio doors, storm windows and doors, U.S. construction activity, market size and projected growths are detailed and segmented into geographic areas. The study is sold on CD in Adobe Acrobat format that makes navigation and printing very easy. Includes links, thumbnails and search options. (Published May 2010)

MSR-09\$2,300.00 (Member price: \$75.00)

AAMA/WDMA U.S. Industry Channel Distribution Report

This study profiles the U.S. market for residential and non-residential windows and doors as it flows through the identified distribution channels. Product volume estimates through the channels to the end user are based on 2009 market figures for residential and non-residential windows and doors. This includes separate analyses for windows, patio doors, interior doors, exterior doors and commercial products in both new and replacement applications. The study is sold on CD in Adobe Acrobat format that makes navigation and printing very easy. Includes links, thumbnails and search options. (Published May 2010)

CDR-09\$1,300.00 (Member price: \$50.00)

AAMA/WDMA U.S. Industry Regional Statistical Review and Forecast

Each Regional Statistical Review (11 total) is a compilation of data from government and industry sources useful in forecasting industry outlook. It contains review, summary and projections of residential/non-residential construction activity and residential/non-residential product statistics for each region (California, Mountain, Mid Atlantic, Florida, East South Central, East North Central, West South Central, West North Central, South Atlantic, Northwest and New England). The studies are sold on a CD, in Adobe Acrobat files, that make navigation and printing very easy with links, thumbnails and search options. (Published May 2010)

California - RIR-09 CA\$150.00 (Member price: \$25.00)
East North Central - RIR-09 ENC\$150.00 (Member price: \$25.00)
East South Central - RIR-09 ESC\$150.00 (Member price: \$25.00)
Florida - RIR-09 FL\$150.00 (Member price: \$25.00)
Mid Atlantic - RIR-09 MA\$150.00 (Member price: \$25.00)
Mountain - RIR-09 MT\$150.00 (Member price: \$25.00)
New England - RIR-09 NE\$150.00 (Member price: \$25.00)
Northwest - RIR-09 NW\$150.00 (Member price: \$25.00)
South Atlantic - RIR-09 SA\$150.00 (Member price: \$25.00)
West North Central - RIR-09 WNC\$150.00 (Member price: \$25.00)
West South Central - RIR-09 WSC\$150.00 (Member price: \$25.00)

AAMA/WDMA U.S. Industry Statistical Review and Forecast (2010/2011)

Compilation of statistical data from government and industry sources useful in forecasting industry outlook. Contains review, summary and projections of residential, non-residential and remodeling trends. The study is sold on CD in Adobe Acrobat format that makes navigation and printing very easy. Includes links, thumbnails and search options. (Published April 2011)

MIR-10\$350.00 (Member price: \$50.00)

AAMA/WDMA U.S. Market Installation Practices and Procedures Report

This report summarizes the results of a special research effort to evaluate installation products and procedures specific to the window and door market. (Published May 2010)

IPR-09\$300.00 (Member price: \$25.00)

CERTIFICATION

Verification Program for Sealed Insulating Glass Thermal Performance Data Library

A verification program has been implemented in order to provide uniform and credible thermal performance test data for inclusion into the data library. This document is to be used in conjunction with AAMA 1505.

110-06 Download - \$30.00 (Member Price: \$10.00)
..... Paper - \$60.00 (Member Price: \$20.00)
..... CD - \$66.00 (Member Price: \$25.00)

The AAMA Certification Program - 1997 Edition

Offers in-depth details about our certification program including association and program background, performance standard requirements, the certification process, and specific component, framing material and performance class requirements focused on the 101/I.S.2-97 standard.

CMB-1-98 \$25.00 (Member Price: \$12.50)/Bundle of 50

The AAMA Certification Program - 2008 Edition

Offers in-depth details about our certification program including association and program background, performance standard requirements, the certification process, and specific component, framing material and performance class requirements focused on the NAFS-08 standard.

CMB-1-08 \$200.00 (Member Price: \$100.00)/Bundle of 50

101/I.S. 2-97 EXCERPT

Product Designations (Product Types, Performance Classes and Grades), and Gateway Performance Requirements.

CMB-3-01 \$0

Why AAMA Certification

This brochure is your simple guide to the AAMA Certification Program. With 40+ years of ANSI-accredited history, the AAMA Certification Program is the largest in the industry. Order this brochure to find out what it means for a product to be AAMA-certified. The perfect guide for manufacturers' sales staff, architects, builders, and homeowners.

CMB-4-07 \$80.00 (Member Price: \$40.00)/Bundle of 50

101/I.S. 2/A440-05 EXCERPT

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements for the AAMA/WDMA/CSA 101/I.S.2/A440-05 document.

CMB-5-05 \$0

101/I.S. 2/A440-08 EXCERPT

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements for the AAMA/WDMA/CSA 101/I.S.2/A440-08 document.

CMB-5-08 \$0

101/I.S. 2/A440-11 EXCERPT

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements for the 101/I.S.2/A440-11 document.

CMB-5-11 \$0

AAMA Certification Program Overview

Offers a brief look at the certification program requirements. Includes a detailed look at the Gold Label performance ratings per the 101/I.S.2/A440-05 standard.

CMB-6-08 \$175.00 (Member Price: \$75.00)/Bundle of 50

Quick Reference Guide to Rigid Vinyl Profile Certification

This quick reference guide provides a step-by-step overview of the AAMA Vinyl Profile Certification Program process. It addresses costs, timeline, qualifications, testing, inspections, and appropriate contacts. This guide is only an introduction to the process; refer to AAMA Procedural Guide 109 for the technical details involved in profile certification.

VPCG-06 \$0

Quick Reference Guide to Vinyl Window Certification

Though the AAMA Certification Program is not material-specific, this quick reference guide provides a step-by-step overview of the vinyl window and sliding glass door certification process. It addresses eligibility, costs, timeline, program requirements, quality assurance and optional testing. For full details on the operation and requirements of the AAMA Certification Program, refer to AAMA Procedural Guide 103.

WWCG-06..... \$0

CERTIFICATION PROCEDURAL GUIDES

Procedural Guide for Certification of Window and Door Assemblies

Process for certification of windows and doors for air-water-structural and thermal product certification. Includes Administration, Labeling, Waiver of Retest, Engineering Design Rules, Plant Quality Control requirements, abbreviated guide for accredited labs, and Auxiliary Test Procedures.

103-11..... \$0

Procedural Guide: Manufactured Home Components

Procedures for manufacturers to test, certify, and label windows and doors intended for use in manufactured homes.

104-83..... \$0

Procedural Guide: Skylights

Process for manufacturers of skylights to test, certify, and label their products.

105-93..... \$0

Guidelines for Laboratory Accreditation for Impact and Cycling Testing

Specific procedure for accreditation of laboratories to test impact-resistant fenestration products, including witness-testing at manufacturers' own in-plant test facilities.

107-99..... \$0

Procedural Guide for the AAMA Window and Door Profile Certification Program

To be used within AAMA's Certification Program for assembled windows and doors and includes all polymeric (i.e. PVC, ABS, fiber reinforced thermoset) profiles. All profiles (sash, frame, etc.) must be tested and certified to these requirements.

109-09..... \$0

Procedural Guide for the AAMA Fenestration Exterior Thermoplastic Profile Certification Program

To be used within AAMA's Certification Program for assembled windows and doors and includes all thermoplastic profiles. All thermoplastic profiles (sash, frame, etc.) must be tested and certified to these requirements.

109-11..... \$0

Procedure for Limited Component Substitution in AAMA-Certified Exterior Side-Hinged Doors

This document provides a procedure for limited substitution of components within an exterior side-hinged door assembly that has been authorized by AAMA for certification. The premise of this procedure is that each base system subject to component substitution was originally qualified by a complete system test. Note that this document is a supplement to AAMA 103-10.

111-09..... \$0

Procedural Guide for the AAMA Fenestration Exterior Fiber Reinforced Thermoset Profile Certification Program

To be used within AAMA's Certification Program for assembled windows and doors and includes all fiber reinforced thermoset profiles. All fiber reinforced thermoset profiles (sash, frame, etc.) must be tested and certified to these requirements.

112-11..... \$0

Procedural Guide for the AAMA Fenestration Exterior Components Certification Program for Molded Aliphatic Polyurethane Elastomer Frame Materials

To be used within AAMA's Certification Program for assembled fenestration products and includes all molded polyurethane elastomer frame materials. All molded aliphatic polyurethane frame materials must be tested and certified to these requirements.

113-11..... \$0

Procedural Guide: Window Inspection and Notification System (WINS)

Program that provides a means for licensed manufacturers to list window parameters (installation instructions, comparative analysis load figures, etc.) beyond standard, permanent-label information, on an AAMA-validated, temporary label. Cited by the Florida Building Code.

203-03..... \$0

Guidelines for AAMA Accreditation of Independent Laboratories Performing On-Site Testing of Fenestration Products

Accreditation for field testing of independent, full-service, AAMA-accredited labs.

204-98..... \$0

In-Plant Testing Guidelines for Manufacturers and Independent Laboratories
Requirements and procedures for witness-testing by accredited lab personnel at manufacturers' in-plant testing facilities.

205-01..... \$0

Procedural Guide: Component Verification

Procedure for component manufacturers to test and list their products for use in AAMA-certified windows and doors. Includes procedures for AAMA approval of manufacturers' in-plant labs.

CVPM-96..... \$0

Laboratory Accreditation Program Operations Manual

Procedures and requirements for AAMA accreditation of independent testing laboratories for this critical phase of the AAMA products certification program. Includes applications for accreditation of independent, full-service labs and for designating manufacturers' in-plant labs for witness testing by accredited lab personnel.

LAP-1-11..... \$0

Quick Reference Guide to Rigid Vinyl Profile Certification

This quick reference guide provides a step-by-step overview of the AAMA Vinyl Profile Certification Program process. It addresses costs, timeline, qualifications, testing, inspections, and appropriate contacts. This guide is only an introduction to the process; refer to AAMA Procedural Guide 109 for the technical details involved in profile certification.

VPCG-06..... \$0

Quick Reference Guide to Vinyl Window Certification

Though the AAMA Certification Program is not material-specific, this quick reference guide provides a step-by-step overview of the vinyl window and sliding glass door certification process. It addresses eligibility, costs, timeline, program requirements, quality assurance and optional testing. For full details on the operation and requirements of the AAMA Certification Program, refer to AAMA Procedural Guide 103.

WWCG-06..... \$0

WINDOW SELECTION

Window and Door Selection Guide

This guide has been prepared to assist architects and specifiers in selecting windows to meet the requirements for specific jobs and conditions. It covers all classes of windows: storm, interior insulating, residential, commercial, heavy commercial and architectural. Design considerations provide information of significant value in planning for the best use of windows; therefore, a description of the various types of windows is available and a discussion of their particular characteristics is also included. Plus, performance requirements, as recommended by AAMA. Basic test method details are also reviewed.

WINDOWS & DOORS

Standard Practice for the Installation of Windows with Flanges or Mounting Fins in Wood Frame Construction

This standard practice covers the installation of windows in new construction utilizing a membrane/drainage system of no more than 3 stories in height and the installation process for windows from pre- to post-installation. This standard practice also provides minimum requirements for window installation based on current best practices. This practice applies to windows which employ a mounting flange or fin that is attached and sealed to the window perimeter frame and is designed as an installation fastening appendage.

Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors

Standard encompasses aluminum, vinyl and wood products from a material-neutral, performance-oriented point of view. It also covers all usage classes from Residential through Architectural. The standard provides a stronger basis for the principle that the structural integrity of a window as a building component is fundamental to any concept of product quality. It is divided into General Requirements, Specific Performance Requirements, Materials, Components and Optional Performance. This standard defines requirements for 5 classes of windows and glass doors: Residential, Light Commercial, Commercial, Heavy Commercial and Architectural. Given its performance (vs. prescriptive) orientation and material neutrality, this standard offers a true basis for comparing the key characteristics and quality attributes of window and door products. Published 1997. Revised 12/99. Errata & Reprint 5/05.

.....Paper – \$60.00 (Member Price: \$30.00)

.....CD – \$65.00 (Member Price: \$35.00)

Voluntary Performance Specification for Windows, Skylights and Glass Doors – A North American Fenestration Standard

This specification encompasses performance requirements for windows, doors and skylights including structural integrity, resistance to water penetration, air leakage and forced entry. Durability requirements include component testing and performance and life cycle testing. Products are divided into five classes for rating purposes. Because the specification is materials neutral, products made from any framing material are included in this specification. The new specification encompasses material from 101/I.S. 2, CSA A440 and other performance standards for fenestration products and is intended to be a companion to 101/I.S. 2 and the eventual replacement of that standard. *Published 5/02 as NAFS-1. Revised 12/02, and published as 101/I.S. 2/NAFS-02. ANSI Approved 2/03.*

101/I.S. 2/NAFS-02 (ANSI/AAMA/WDMA)

..... Download – \$30.00 (Member Price: \$15.00)
..... Paper – \$60.00 (Member Price: \$30.00)
..... CD – \$65.00 (Member Price: \$35.00)

Standard/Specification for Windows, Doors, and Unit Skylights

This specification is the first edition of a jointly published fenestration standard by US and Canadian Associations (AAMA/WDMA and CSA). This standard is intended to replace previous versions of AAMA/NWDA 101/I.S.2-97, AAMA/WDMA 101/I.S.2/NAFS-02 and CSA A440. This standard identifies the requirements for windows, glass doors, skylights and for the first time side-hinged exterior doors. Included (when applicable) are performance requirements for structural integrity, water resistance, air leakage and forced entry. Window and door products are still divided into five classes for rating purposes, while maintaining material neutrality. In addition to the changes listed above, this standard includes numerous other revisions.

101/I.S. 2/A440-05 (AAMA/WDMA/CSA)

..... Download – \$36.00 (Member Price: \$18.00)
..... Paper – \$60.00 (Member Price: \$30.00)
..... CD – \$60.00 (Member Price: \$30.00)

North American Fenestration Standard/Specification for windows, doors, and skylights

This is the second edition of AAMA/WDMA/CSA 101/I.S.2/A440; it supersedes the previous edition, published in 2005 under the title Standard/Specification for windows, doors, and unit skylights. It is jointly published by the American Architectural Manufacturers Association (AAMA), the Window & Door Manufacturers Association (WDMA), and the Canadian Standards Association (CSA). *This purchase also includes the Update #1 released in June 2008, Update #2 released in October 2008 and Update #3 released in June 2009.*

101/I.S. 2/A440-08 (AAMA/WDMA/CSA)

..... Download – \$50.00 (Member Price: \$25.00)
..... Paper – \$75.00 (Member Price: \$38.00)

North American Fenestration Standard/Specification for windows, doors, and skylights

This is the third edition of AAMA/WDMA/CSA 101/I.S.2/A440; it supersedes the previous editions, published in 2008 under the same title and published in 2005 under the title Standard/Specification for windows, doors, and unit skylights. It is jointly published by the American Architectural Manufacturers Association (AAMA), the Window & Door Manufacturers Association (WDMA), and the Canadian Standards Association (CSA).

The following significant changes have been made:

- (a) a thorough restructuring of this Standard/Specification, with separate sections for products and materials and components;
- (b) addition of requirements on lead content for hardware;
- (c) reorganized mullion provisions, with new ratings and designations;
- (d) addition of parallel opening windows;
- (e) expansion of tubular daylighting device (TDD) products to include closed ceiling and open ceiling options;
- (f) updated tables; and
- (g) addition of criteria for secondary storm products (SSPs) throughout this Standard/Specification

101/I.S. 2/A440-11 (AAMA/WDMA/CSA)

..... Download – \$80.00 (Member Price: \$40.00)
..... Paper – \$120.00 (Member Price: \$60.00)

Standard Practice for the Installation of Windows with Frontal Flanges for Surface Barrier Masonry Construction for Extreme Wind/Water Conditions

This standard practice covers the installation of frontal-flanged windows into buildings with surface barrier wall construction (masonry/concrete) of no more than three stories in height and applies to frontal flanged windows which employ an integral or applied flange that is attached and sealed to the window perimeter frame and is designed as an appendage that will cover a previously-installed buck and/or integrate with a pre-cast sill. This standard practice covers the installation process for windows from pre- to post-installation; it does not include fabrication techniques that would be required to join individual windows to each other, either horizontally or vertically.

General Guidelines for Troubleshooting Welded Thermoplastic Corners

This general guideline identifies methods for inspection and suggested checks and solutions relating to identified quality issues pertaining to welded thermoplastic corners on fenestration products. It is designed for use by the fabricator covering a wide range of processing steps from the receipt of extrusions, through sawing, welding, corner clearing, assembly and shipping. The guideline also includes an Appendix for quality control testing the effectiveness of the corner welding or bonding process.

-Paper – \$90.00 (Member Price: \$30.00)
- CD – \$96.00 (Member Price: \$35.00)

Voluntary Laboratory Test Method to Qualify Fenestration Installation Procedures

This test method is used to evaluate and qualify specific fenestration installation procedures based on laboratory measurements of air leakage and water penetration resistance. The test specimen and procedures are based on wood frame construction generally used in new construction residential applications.

- 504-05 Download – \$30.00 (Member Price: \$10.00)
-Paper – \$60.00 (Member Price: \$20.00)
- CD – \$66.00 (Member Price: \$25.00)

Dry Shrinkage and Composite Performance Thermal Cycling Test Procedure

This test procedure outlines a laboratory method to measure the amount of dry shrinkage and retained composite longitudinal shear resistance of extrusions incorporating a thermal barrier after thermal cycling. The process of thermal cycling described in this document is referred to as the "differential" method. It is to be used for product qualification of all types of thermal barriers.

Voluntary Guide Specification for Blast Hazard Mitigation for Fenestration Systems

This guide specification may be used to establish system performance classifications that can be expected to reduce the hazards resulting from a prescribed blast load. This guide specification allows manufacturers to voluntarily test products to a standard test size for system evaluation and comparison. System categorization and standard test sizes have been established for a broad range of product types.

-Paper – \$60.00 (Member Price: \$20.00)
- CD – \$66.00 (Member Price: \$25.00)

Voluntary Guideline for Forensic Water Penetration Testing of Fenestration Products

The purpose of this AAMA Voluntary Guideline is to provide specific information to assist industry professionals in selecting the appropriate adaptations to the existing testing standards for application to field investigations of fenestration products.

- 511-08 Download – \$45.00 (Member Price: \$15.00)
-Paper – \$90.00 (Member Price: \$30.00)
- CD – \$96.00 (Member Price: \$35.00)

Voluntary Specifications for Tornado Hazard Mitigating Fenestration Products

This specification uses existing test methods and other procedures to qualify windows and other glazed fenestration products tornado hazard mitigation. This specification provides a system for rating the ability of windows to withstand impact, pressure cycling, and water penetration generally associated with tornado conditions.

- 512-11 Download – \$45.00 (Member Price: \$15.00)
-Paper – \$90.00 (Member Price: \$30.00)
- CD – \$96.00 (Member Price: \$35.00)

Voluntary Specification for Rating the Severe Wind-Driven Rain Resistance of Windows, Doors and Unit Skylights

This voluntary specification provides an optional rating of the ability of fenestration products to resist severe wind-driven rain. This voluntary specification is based on a rapidly pulsed pressure differential method, recognizing that conditions encountered during tropical storms, hurricanes, or severe thunder storms are not static. In addition, the procedures and equipment required to perform the specified tests are provided.

- 520-09 Download – \$45.00 (Member Price: \$15.00)

Specification for Operating Cycle Performance of Side-Hinged Exterior Door Systems

The purpose of this specification is to establish a standard test method and set of performance criteria for side-hinged exterior door systems and their associated hardware under accelerated operating conditions.

- 920-11 Download – \$30.00 (Member Price: \$10.00)
-Paper – \$60.00 (Member Price: \$20.00)
- CD – \$66.00 (Member Price: \$25.00)

Specification for Determining the Vertical Loading Resistance of Side-Hinged Door Leaves

The purpose of this specification is to establish a standard method of evaluating a side-hinged door leaf for its ability to resist a vertical load in a typical door frame application. This specification determines the ability of a side-hinged door system to remain operable following the application of a vertical load along the lock stile of the door leaf.

Standard Practice for Installation of Windows with a Mounting Flange in Open Stud Frame Construction for Low Wind/Water Exposure

This practice addresses the recommended methods and/or sequences used to apply/modify the water-resistive barrier or other flashing and sealing materials to the open-framed opening. The techniques demonstrated in this standard practice have been developed specifically to create a moisture barrier to incidental liquid water penetration at the external interface between the window and rough opening. Any water intrusion; whether through the external interface between the window and rough opening, the window joinery, or the installation joints around the perimeter of the window will not have a means to exit to the building exterior. As a result, this standard is recommended for buildings/installations considered at low risk of water intrusion. (Addendum released in February 2011) AVAILABLE FOR ANNUAL ELECTRONIC LICENSE

Rain Penetration Control – Applying Current Knowledge

AAMA's latest publication is available in the United States through a cooperative effort with the Canada Mortgage and Housing Corporation (CMHC). "Rain Penetration Control – Applying Current Knowledge" was developed based on the previous related AAMA standard ("The Rain Screen Principle and Pressure-Equalized Wall Design") and extensive research and field testing conducted by the CMHC. The standard provides detailed information and guidance regarding increasing product performance, specifically related to windows, curtain walls and storefronts. This new AAMA/CMHC document includes a section on mechanisms of water penetration, control of water penetration, design guidelines for rainscreen and pressure equalized walls and an example of designing using the covered principles. For architects, specifiers, designers and those who wish to understand the possibilities for improving wall performance, this is an excellent resource. (Sold on CD.)

WALL CLADDING

Voluntary Test and Classification Method for Drained and Back Ventilated Rain Screen Wall Cladding Systems

This voluntary test and classification method establishes the requirements for test specimens, apparatus, test procedures, test reports and performance data that may be used in the evaluation of drained and back ventilated rain screen wall cladding systems. The primary purpose(s) of this test method is to quantify the volume of rain water contacting an imperfect AWB and the system's ability to allow for ventilation/drying as measured by air flow through the cladding.

TECHNICAL INFORMATION REPORTS

Sound Control for Fenestration Products

This document was prepared for anyone who requires information on what sound is, how it is transmitted, how it is measured and how its transmission can be controlled. Although technical in nature, this document is organized to be useful to anyone from the window designer who is trying to meet an architect's sound control specification to a window salesman who just wants to help a customer understand how sound travels and what can be done to "cut down on the noise". Furthermore, this document will clarify and differentiate between the two methods of product classification, STC (Sound Transmission Class) and OITC (Outdoor-Indoor Transmission Class), and their appropriate use.

Structural Performance of Composite Thermal Barrier Framing Systems

Though there are several thermal barrier systems in use today, the scope of this document will address the composite thermal barrier systems that are the most widely used, as known by this document's authors. Guidelines for these framing systems are offered on cavity design, thermal barrier material, selection, testing manufacturing, fabrication, installation and environmental performance. The intent of this report is to provide the design professional with sufficient information to intelligently evaluate composite thermal barrier systems.

TIR A8-08\$105.00 (Member Price: \$35.00)

Metal Curtain Wall Fasteners

A comprehensive guide for the proper selection and specification of fasteners used in curtain wall construction that helps in choosing the proper fasteners for framing members and anchoring of curtain wall systems to the building structure. 2000 Addendum published separately.

MOBILE & MANUFACTURED HOUSING COMPONENTS

Voluntary Standard for Utilization in Manufactured Housing for Primary Windows and Sliding Glass Doors

This performance standard sets the requirements for primary windows and sliding glass doors used in manufactured housing. The requirements contained herein are intended to set a reasonable performance standard that is acceptable to fulfill the requirements for primary windows and sliding glass doors within the manufactured housing industry.

SKYLIGHTS & SPACE ENCLOSURES

Voluntary Specification for Skylights

Specifications include material and finish requirements as well as performance requirements for air infiltration, water resistance and structural loading. Skylights covered are residential and commercial factory glazed assemblies shipped complete for installation in a roof opening. Formatted to be consistent with ANSI/AAMA/NWDA 101/I.S.2-97. Editorial revisions made and errata published outlining these revisions October 2003. *Document reissued November 2003.*

..... CD – \$66.00 (Member Price: \$25.00)

Daylighting Design Guidelines for Roof Glazing in Atrium Spaces

Focuses on large roof areas or atrium (30 to 90% of the roof area) for net annual energy and peak demand as the key measures of performance. Outlines a procedure for making early schematic design decisions regarding the use of relatively large areas of horizontal roof glazing in the prototype atrium configuration. Energy balance techniques described.

Skylight Fall Protection Position Paper

This position paper, created by AAMA's Skylight Council, reinforces that the responsibility for fall protection must be shared amongst the many parties involved with the design, construction and maintenance of roofs. The paper outlines safety procedures for minimizing risk to form a strong foundation for mitigating the occurrence of all falls from roofs and roof openings.

SKY-1-08 \$0

Daylighting Basics, Daylighting and Energy Savings

This fact sheet, created by AAMA's Skylight Council, details the benefits of daylighting through skylights, while also reinforcing the energy savings that can be achieved when utilizing these products for daylighting.

SKY-2-11 \$0

Sloped Glazing Guidelines

The objective of this guideline is to assist the designer (i.e. design architect, engineer) in the proper selection of glazing materials for use in sloped glazing applications above human traffic or occupied areas. Covers general provisions for design factors, breakage, condensation, loadings, deflection, inspection and testing for skylights and space enclosures titled more than 15 degrees from the vertical plane.

DECKING & GUARDRAILS

Voluntary Specification for Rigid Poly (Vinyl Chloride) (PVC) Exterior Plank Profiles Used for Decking and Dock Walking Surface

This specification establishes the minimum requirements for poly vinyl chloride (PVC) exterior plank profiles used for decking and dock walking surfaces. Decking and dock walking surfaces made with exterior plank profiles that meet the requirements of this specification are expected to perform well in actual use, assuming adequate product design. The requirements include dimensional stability, falling weight impact resistance, weatherability, heat resistance, heat build-up and weight tolerance.

.....CD – \$148.50 (Member Price: \$56.25)

AAMA Hardware Documents Bundle

This comprehensive aluminum finishing documents bundle includes all of the following documents (25% off the price if purchased separately): AAMA 901-10, AAMA 902-07, AAMA 904-09, AAMA 906-07, AAMA 907-05 and AAMA 908-09.

BU-HARDWARE-11

..... Download – \$135.00 (Member Price: \$45.00)
.....Paper – \$270.00 (Member Price: \$90.00)
.....CD – \$297.00 (Member Price: \$112.50)

General Testing Documents Bundle

This comprehensive aluminum finishing documents bundle includes all of the following documents (25% off the price if purchased separately): AAMA 501.1-05, AAMA 501.2-09, AAMA 501.4 & 501.6-09, AAMA 501.5-07, AAMA 501.7-11, AAMA 501-05, AAMA 502-11, AAMA 503-08, AAMA 504-05, AAMA 505-09, AAMA 506-11, AAMA 508-07, AAMA 509-09 and AAMA 511-08.

BU-TEST-1-11

Download – \$360.00 (Member Price: \$120.00)
Paper – \$720.00 (Member Price: \$240.00)
CD – \$783.00 (Member Price: \$292.50)

Field Testing Documents Bundle

This comprehensive aluminum finishing documents bundle includes all of the following documents (25% off the price if purchased separately): AAMA 501.2-09, AAMA 501-05, AAMA 502-11, AAMA 503-08 and AAMA 511-08.

BU-TEST-2-11

Download – \$146.25 (Member Price: \$48.75)
Paper – \$292.50 (Member Price: \$97.50)
CD – \$315.00 (Member Price: \$116.25)

Laboratory Testing Documents Bundle

This comprehensive aluminum finishing documents bundle includes all of the following documents (25% off the price if purchased separately): AAMA 501.1-05, AAMA 501.4 & 501.6-09, AAMA 501.5-07, AAMA 501.7-11, AAMA 501-05, AAMA 504-05 and AAMA 506-11.

BU-TEST-3-11

Download – \$157.50 (Member Price: \$52.50)
Paper – \$315.00 (Member Price: \$105.00)
CD – \$342.00 (Member Price: \$131.25)

CONSUMER LITERATURE

The AAMA Certification Program – 1997 Edition

Offers in-depth details about our certification program including association and program background, performance standard requirements, the certification process, and specific component, framing material and performance class requirements focused on the 101/I.S.2-97 standard.

CMB-1-98..... \$25.00 (Member Price: \$12.50)/Bundle of 50

The AAMA Certification Program – 2008 Edition

Offers in-depth details about our certification program including association and program background, performance standard requirements, the certification process, and specific component, framing material and performance class requirements focused on the NAFS-08 standard.

CMB-1-08..... \$200.00 (Member Price: \$100.00)/Bundle of 50

101/I.S. 2-97 Excerpt

Product Designations (Product Types, Performance Classes and Grades), and Gateway Performance Requirements

CMB-3-01..... \$0

Why AAMA Certification

This brochure is your simple guide to the AAMA Certification Program. With 40+ years of ANSI-accredited history, the AAMA Certification Program is the largest in the industry. Order this brochure to find out what it means for a product to be AAMA-certified. The perfect guide for manufacturers' sales staff, architects, builders, and homeowners.

CMB-4-07..... \$80.00 (Member Price: \$40.00)/Bundle of 50

101/I.S. 2/A440-05 Excerpt

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements.

CMB-5-05..... \$0

101/I.S. 2/A440-08 Excerpt

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements.

CMB-5-08..... \$0

101/I.S. 2/A440-11 Excerpt

Product Designations (Product Types, Performance Classes & Grades), and Gateway Performance Requirements.

CMB-5-11..... \$0

AAMA Certification Program Overview

Offers a brief look at the certification program requirements. Includes a detailed look at the Gold Label performance ratings per the 101/I.S.2/A440-05 standard.

CMB-6-08..... \$175.00 (Member Price: \$75.00)/Bundle of 50

Caring for Your Windows, Doors and Skylights

This brochure provides tips on proper care and maintenance of windows, doors and skylights to ensure optimal performance of these products.

PMB-1-11..... \$60.00 (Member Price: \$20.00)/Bundle of 50

Planning for Patient Safety - Operable Windows in Healthcare Facilities

This brochure was developed by the AAMA Architectural Window Council to encourage architects, specifiers, building owners, and other industry professionals to use operable windows in healthcare facility applications as a means of addressing fire safety needs while providing other benefits as well.

PPS-1-05..... \$40.00 (Member Price: \$20.00)/Bundle of 50

A Clear View - Vinyl Windows and the Environment

This brochure takes a look at vinyl window attributes and their relationship to environmental performance. This brochure was developed and published by the Vinyl Institute and the AAMA Vinyl Materials Council.

VIB-0307..... \$100.00 (Member Price: \$50.00)/Bundle of 50

Quick Reference Guide to Rigid Vinyl Profile Certification

This quick reference guide provides a step-by-step overview of the AAMA Vinyl Profile Certification Program process. It addresses costs, timeline, qualifications, testing, inspections, and appropriate contacts. This guide is only an introduction to the process; refer to AAMA Procedural Guide 109 for the technical details involved in profile certification.

VPCG-06..... \$0

Quick Reference Guide to Vinyl Window Certification

Though the AAMA Certification Program is not material-specific, this quick reference guide provides a step-by-step overview of the vinyl window and sliding glass door certification process. It addresses eligibility, costs, timeline, program requirements, quality assurance and optional testing. For full details on the operation and requirements of the AAMA Certification Program, refer to AAMA Procedural Guide 103.

VWCG-06..... \$0

VINYL MATERIALS

The Case for Vinyl Windows is Clear

A one page promotional pamphlet on vinyl by the Vinyl Materials Council of AAMA. Funded and created by the AAMA Vinyl Material Council.

VM-1..... \$0

Vinyl Windows, Doors & More – Why Builders Benefit

Home builders explain how vinyl products boost their sales efforts through quality, energy efficiency and design options in any market. (A special advertisement supplement by Professional Builder for AAMA.) Funded and created by the AAMA Vinyl Material Council.

VM-2..... \$0

Why Vinyl Windows for New Construction?

Part of the information series from The Vinyl Materials Council of the AAMA on vinyl windows. Funded and created by the AAMA Vinyl Material Council.

VM-3..... \$0

Information About Vinyl Windows

A folder including vinyl information on, the environment, fire performance and background. This is part of the information series from The Vinyl Materials Council of the AAMA on vinyl windows. Funded and created by the AAMA Vinyl Material Council.

VM-4..... \$0

Avoiding the Landfill: The Recycling of Vinyl Windows and Doors

Part of the information series from AAMA's Vinyl Material Council on the recycling of vinyl windows and doors. Funded and created by the AAMA Vinyl Material Council.

VM-5..... \$0

101/I.S.2/NAFS-02		ANSI/AAMA/WDMA Voluntary Performance Specification for Windows, Skylights and Glass Doors – A North American Fenestration Standard	3
101/I.S.2/A440-05		Standard/Specification for Windows, Doors and Unit Skylights	3
101/I.S.2/A440-08		North American Fenestration Standard/Specification for Windows, Doors, and Skylights	3
101/I.S.2/A440-11		North American Fenestration Standard/Specification for Windows, Doors, and Skylights	3
103-11		Procedural Guide for Certification of Window and Door Assemblies	2
104-83		Procedural Guide: Manufactured Home Components	2
105-93		Procedural Guide: Skylights	2
107-99		Guidelines for Laboratory Accreditation for Impact and Cycling Testing	2
109-09		Procedural Guide for the AAMA Window and Door Profile Certification Program	2
109-11		Procedural Guide for the AAMA Fenestration Exterior Thermoplastic Profile Certification Program	2
110-06		Verification Program for Sealed Insulating Glass Thermal Performance Data Library.....	1
111-09		Procedure for Limited Component Substitution in AAMA-Certified Exterior Side-Hinged Doors.....	2
112-11		Procedural Guide for the AAMA Fenestration Exterior Fiber Reinforced Thermoset Profile Certification Program.....	2
113-11		Procedural Guide for the AAMA Fenestration Exterior Components Certification Program for Molded Aliphatic Polyurethane Elastomer Frame Materials.....	2
200			
200-09		FMA/AAMA Standard Practice for the Installation of Windows with Frontal Flanges for Surface Barrier Masonry Construction for Extreme Wind/Water Conditions.....	3
203-03		Procedural Guide: Window Inspection and Notification System (WINS)	2
204-98		Guidelines for AAMA Accreditation of Independent Laboratories Performing On-Site Testing of Fenestration Products	2
205-01		In-Plant Testing Guidelines for Manufacturers and Independent Laboratories.....	2
300			
303-08		Voluntary Specification for Rigid Polyvinyl Chloride (PVC) Exterior Profiles	3
304-07		Voluntary Specification for Acrylonitrile-Butadiene-Styrene (ABS) Exterior Profiles Capped with ASA or ASA/PVC Blends.....	3
305-11		Voluntary Specification for Fiber Reinforced Thermoset Profiles.....	3
306-04		Voluntary Specification for Rigid Poly (Vinyl Chloride) (PVC) Exterior Plank Profiles Used for Decking and Dock Walking Surface.....	11
307-11		Voluntary Specification for Laminates Intended for Use on AAMA Certified Profiles	3
308-08		Voluntary Specification for Cellular Polyvinyl Chloride (PVC) Exterior Profiles.....	3
309-04		Standard Specification for Classification of Rigid Thermoplastic/ Cellulosic Composite Materials	3
310-04		Voluntary Specification for Reinforced Thermoplastic Fenestration Exterior Profile Extrusions.....	3
311-05		Voluntary Specification for Rigid Thermoplastic Cellulosic Composite Fenestration Exterior Profiles	3
312-05		Performance Requirements for the Lamination of Wood and Cellulosic Composite Profiles	3
313-10		Voluntary Specification for Molded Aliphatic Polyurethane Elastomer Frame Materials	4
320-10		General Guidelines for Troubleshooting Welded Thermoplastic Corners.....	4
400			
450-10		Voluntary Performance Rating Method for Muller Fenestration Assemblies.....	4
500			
501-05		Methods of Test for Exterior Walls	6
501.1-05		Standard Test Method for Water Penetration of Windows, Curtain Walls and Doors Using Dynamic Pressure.....	6
501.2-09		Quality Assurance and Diagnostic Water Leakage Field Check of Installed Storefronts, Curtain Walls, and Sloped Glazing Systems	6
501.4-09 / 501.6-09		Recommended Static Test Method for Evaluating Curtain Wall and Storefront Systems Subjected to Seismic and Wind Induced Interstory Drifts and Recommended Dynamic Test Method for Determining the Seismic Drift Causing Fallout from a Wall System	6
501.5-07		Test Method for Thermal Cycling of Exterior Walls	6
501.7-11		Recommended Static Test Method for Evaluating Windows, Window Wall, Curtain Wall and Storefront Systems Subjected to Vertical Inter-Story Movements	6
502-11		Voluntary Specification for Field Testing of Newly Installed Fenestration Products.....	4
503-08		Voluntary Specification for Field Testing of Newly Installed Storefronts, Curtain Walls and Sloped Glazing Systems	6
504-05		Voluntary Laboratory Test Method to Qualify Fenestration Installation Procedures	4
505-09		Dry Shrinkage and Composite Performance Thermal Cycling Test Procedure.....	4
506-11		Voluntary Specifications for Impact and Cycle Testing of Fenestration Products.....	4
507-07		Standard Practice for Determining the Thermal Performance Characteristics of Fenestration Systems Installed in Commercial Buildings	6
508-07		Voluntary Test Method and Specification for Pressure Equalized Rain Screen Wall Cladding (Panel) Systems	6
509-09		Voluntary Test and Classification Method for Drained and Back Ventilated Rain Screen Wall Cladding Systems.....	7
510-06		Voluntary Guide Specification for Blast Hazard Mitigation for Fenestration Systems	4
511-08		Voluntary Guideline for Forensic Water Penetration Testing of Fenestration Products	4
512-11		Voluntary Specification for Tornado Hazard Mitigating Fenestration Products.....	4
520-09		Voluntary Specification for Rating the Severe Wind-Driven Rain Resistance of Windows, Doors and Unit Skylights	4
600			
609 & 610-09		Cleaning and Maintenance Guide for Architecturally Finished Aluminum	9
611-98		Voluntary Specification for Anodized Architectural Aluminum.....	9
612-02		Voluntary Specification, Performance Requirements, and Test Procedures for Combined Coatings of Anodic Oxide and Transparent Organic Coatings on Architectural Aluminum	9
613-08		Voluntary Performance Requirements and Test Procedures for Organic Coatings on Plastic Profiles	9
614-05		Voluntary Specification, Performance Requirements and Test Procedures for High Performance Organic Coatings on Plastic Profiles	9
615-05		Voluntary Specification, Performance Requirements and Test Procedures for Superior Performing Organic Coatings on Plastic Profiles	9
